

ADARSH KUMAR GUPTA KASAUDHAN

Bengaluru, Karnataka | Email: adarsh960@gmail.com | Phone no:7054054583
Linkedin:www.linkedin.com/in/adarsh-kasaudhan | Github: <https://github.com/AdarshKasaudhan1>

PROFESSIONAL SUMMARY

Detail-oriented BCA student with strong analytical and problem-solving skills, experienced in building technical products and collaborating across cross-functional teams. Skilled in Java, Python, SQL, REST APIs, and technical troubleshooting, with excellent written communication and a customer-first approach. Seeking to contribute to Stripe's Operations Associate Apprenticeship by delivering exceptional user support and process excellence.

TECHNICAL SKILLS

- Programming:** Python, Java, JavaScript, SQL
- AI & Machine Learning:** LangChain, LangGraph, NLP, OCR, Scikit-learn, Streamlit
- Web Development:** React.js, Node.js, Express.js, HTML5, CSS3, REST APIs
- Database:** MongoDB, MySQL, MongoDB Atlas
- Cloud & DevOps:** AWS, Azure, Git, GitHub, Vercel, Render
- Analytics:** Tableau, Power BI, Excel, Jupyter Notebook

EDUCATION

Alliance University, Bengaluru, Karnataka	2024 – 2027
Bachelor of Computer Applications (BCA) — Artificial Intelligence & Machine Learning	
Aggregate: 82.87% 1st Year CGPA: 8.53 2nd Year CGPA: 9.20	
Zalmonah Little Angels Boarding Secondary School, Nepal	2023
Higher Secondary (Grade XII), Nepal Board — GPA 3.46/4.0 (86.5%)	
Zalmonah Little Angels Boarding Secondary School, Nepal	2021
SSLC (Grade X), Nepal Board — GPA 3.50/4.0 (87.5%)	

PROJECTS

FestNest — Co-Founder Live Demo	2025
Startup-grade, mobile-first campus event discovery platform built with React.js, Node.js, Express.js, and MongoDB.	
- Built and maintained a campus event platform serving student users through a responsive web application. - Collaborated with designers, developers, and student stakeholders to improve user experience and resolve reported issues. - Investigated user-reported bugs, documented resolutions, and ensured smooth end-to-end event registration workflows. - Coordinated deployment and feature updates using Git, Vercel, and Render.	

AI Resume Builder — Agentic AI System

Intelligent 4-agent AI resume builder that tailors resumes to specific job descriptions using LangGraph, LangChain, Groq Llama 3.3, and Streamlit.

- Designed a 4-agent AI workflow using LangGraph and LangChain for intelligent resume generation.
- Integrated Groq Llama 3.3 to tailor resumes based on job descriptions and missing skills.
- Automated ATS-friendly resume optimization through multi-agent reasoning.

Multimodal Spam Guard [GitHub link](#)

Flask-based intelligent spam detection system with OCR-enabled image text extraction.

- Developed a technical solution that helps users identify spam from text and images.
- Diagnosed OCR processing issues and improved classification reliability through systematic debugging.
- Focused on accurate issue detection and clear user-facing functionality.

Turning Plastic Waste into Sustainable Building Blocks [Go Live](#)

2026

Turning Plastic Waste into Sustainable Building Blocks (1M1B Green Internship Capstone)

- Developed a sustainability solution that converts low-value plastic waste into durable eco-bricks for non-structural construction applications.
- Engineered a complete workflow covering plastic collection, segregation, compression, and eco-brick fabrication.
- Analysed project data using Tableau and created dashboards to monitor collection trends, production output, and impact.
- Promoted circular economy practices through campus awareness campaigns, encouraging responsible plastic disposal and recycling participation.
- Presented the project as a scalable environmental innovation integrating sustainability, data analytics, and community engagement.

INTERNSHIPS

[AI for Sustainability Internship — AICTE + IBM SkillsBuild](#)

- Applied AI concepts to solve sustainability-focused case studies using Python and data analysis.
- Explored machine learning applications for environmental and social impact problems.
- Collaborated with IBM Skills Build mentors on guided industry projects and presentations.

[Green Sustainability Intern AICTE × Salesforce × 1M1B Green Internship | Jan 2026 – Mar 2026](#)

- Led a campus-wide plastic waste collection campaign by coordinating student volunteers and executing weekly sustainability drives.
- Designed and manufactured eco-bricks by repurposing non-recyclable plastic waste into sustainable building block prototypes.
- Collected, cleaned, and categorized plastic waste to improve recycling efficiency and reduce landfill disposal.
- Built an interactive Tableau dashboard to visualize waste collection, eco-brick production, and environmental impact metrics.
- Collaborated with mentors and cross-functional student teams to deliver a community sustainability project aligned with the UN Sustainable Development Goals

ACHIEVEMENTS & LEADERSHIP

[NCC Cadet — Leadership & Coordination](#)

Coordinated logistics, communicated across multiple teams, supported event execution, and ensured timely resolution of operational challenges during NCC activities.
